PROFESSIONAL SUMMARY

Software & Systems Engineer experienced in designing scalable backend architectures, enterprise process automations, and AI-driven solutions. Proven ability bridging full-stack software development (Node.js, TypeScript, React Native, C#, .NET, Python) with reliable security practices, real-time data streaming, and computer vision pipelines. Skilled in collaborating with cross-functional teams, writing maintainable code, and delivering effective technological solutions for enterprise clients.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, C#, Python, SQL, HTML/CSS
Backend & Frameworks:	Node.js, Express, Next.js, .NET Core, FastAPI, RESTful APIs
Frontend & Mobile:	React, React Native, Angular, Tailwind CSS, Asynchronous State Management
Databases & Infrastructure:	PostgreSQL (Row Level Security), Redis, Relational ORMs, SQL Server, Cloud Storage, AWS, Docker
AI, Vision & Automation:	Computer Vision (Object Detection & Tracking), WebRTC Streaming, Anthropic Claude API, OpenAI (Whisper / GPT), AI Code Agents, RPA Frameworks

FEATURED SOFTWARE & SYSTEMS PROJECTS

TuDivan — Teleconsultation & Clinical SaaS2026

TypeScript Monorepo, Next.js, Node.js, PostgreSQL, WebRTC Streaming, Anthropic Claude

- Built a multi-tenant healthcare platform focused on patient privacy, data security, and clinical teleconsultation.
- Engineered database Row Level Security (RLS) and application-level envelope encryption to safeguard clinical records.
- Implemented custom authentication with OAuth 2.0 support and automated CI pipeline checks to enforce architecture standards.
- Integrated real-time video streaming alongside AI-assisted transcription and session summarization.

MeFaltaUno — Sports Venue Management & Vision Engine2026

Node.js, Express, PostgreSQL, React Native, Python, FastAPI, Deep Learning & Vision Models

- Developed an AI computer vision pipeline using object detection and multi-object tracking models with geometric camera calibration for real-time sports analysis.
- Designed a Node/TypeScript REST API to manage venue schedules, player bookings, and automated payment gateway webhooks.
- Built a cross-platform mobile application featuring interactive maps, push notifications, and deep linking.

Lugarcito — Gastronomy Discovery Platform & Booking System2026

Node.js, Express, PostgreSQL, React Native, Next.js, Anthropic Claude & OpenAI Whisper

- Architected a modular full-stack booking platform backed by automated unit and integration tests.
- Implemented geospatial SQL algorithms for distance-based discovery and dynamic venue ranking.
- Integrated natural language voice search using OpenAI Whisper for speech processing and Anthropic Claude for query understanding.

PROFESSIONAL EXPERIENCE

Senior RPA & Automation Engineer | Tquila Automation

Dec 2025 – Present

Remote (USA Enterprise Clients)

- Engage directly with US enterprise clients to design, architect, and deploy end-to-end process automations.
- Utilize Data Fabric and enterprise orchestration tools to unify data sources and optimize complex multi-system workflows.
- Apply AI Code Agents within automation solutions to enhance performance, accelerate development, and handle complex business logic.
- Author detailed technical architecture documentation (PDDs, SDDs) maintaining high standards for system scalability and code quality.

Software Engineer and Digital Marketing Specialist | NomadSoft

2023 – Present

- Develop custom software solutions including web and mobile applications using C#, React, React Native, .NET, JavaScript, HTML, and CSS.
- Lead UX/UI design initiatives to ensure intuitive, high-performance user experiences across client applications.
- Design and execute digital marketing strategies to optimize product visibility and user acquisition.

RPA Team Leader | Practia

2021 – 2024

- Led an RPA development team utilizing automation platforms integrated with .NET, SQL, and REST APIs for enterprise clients such as Montes del Plata.
- Conducted requirements analysis, solution design, and process optimization for large-scale digital transformation initiatives.
- Managed project delivery, client communications, and Agile sprint execution using Jira and Git version control systems.

EDUCATION & CERTIFICATIONS

Systems Engineering: Facultad de Ingeniería ORT

English Certification: Advanced C1 Level (Delfin Language School, Ireland)
